

ISO Training, Category 3, ISO Standard 18436-2 with Bill Kilbey of Mobius Institute in 85737 Ismaning, Germany

This course is intended for personnel who have at least two years vibration analysis experience and a thorough understanding of vibration theory and terminology. The course provides an indepth study of diagnostic measurement techniques and the associated applications of these techniques. It is expected that the attendee is either the leader of the vibration team or takes a leading role in diagnosing faults and making final recommendations. The participant must fully understand all of the data collector options, special test capabilities and analysis tools, and must understand the widest range of fault conditions. This course will give the analyst all of the skills and knowledge necessary to solve all fault conditions and to run a successful condition monitoring program.

Prospective students for ISO CAT III have to pass the ISO CAT II exam before they are allowed to attend the CAT III training & write the exam.
